Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Torque Threaded Caps to Proper Tightness on Large Stable Containers

Inline Filling Systems automatic chuck cap tightener torques threaded caps to proper tightness at rates up to 30 CPM.

Operator places cap onto or into container. The machine automatically handles the container and torque action. An inline gating system with few to no change parts is used on this version. The inline style gate container handling is usually reserved for larger, stable and oftentimes rectangular containers.

The pneumatic version torquer can provide 13-75 inch pounds of torque. These units are available in single head and two head versions.
