Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Cap Tightener with Precise Torque for Large Stable Containers

Inline Filling Systems fully automatic dual-head electric cap tightener torques caps onto containers with higher throughput rates than the single head version.

The electric inline chuck cap tightener uses few to no change parts and is usually reserved for larger, stable and often rectangular or square containers. Higher torque ranges and more precise torque application are achievable in this electric version. Very precise torque for demanding or critical applications are possible on this platform with optional magnetic, strain gauged clutches and torque-open chuck heads.

Features

Electric, inline
