Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Sort Tall Bottle Caps

Inline Filling Systems centrifugal cap sorter is used primarily for tall caps and caps with custom geometries.

This cap sorters orients caps with a spinning disk. Improperly oriented caps are air rejected back to the center of the disk for resorting. Properly oriented caps are transferred to an inclined cap chute and are carried to the capping machine pick-off.

Features

Unit includes a dedicated disk and C-curve for each cap size.

One attachment bolt for the disk and 3 hand tightened attachment knobs for the C-curve give operators no adjustment plug-and-play changeovers in minutes.

Some very tall caps require an additional powered belt and hook assembly for orientation prior to the cap chute.

Separate frame and includes all controls for operation.

Sorter is constructed with an aluminum frame and uses stainless steel and plastic contact parts.

Please [contact Pro Pac](#) or call 888-318-0083 for your liquid filling equipment.
