Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Sort Bottle Caps from Large Bulk Hopper

Inline Filling Systems fully-automatic cap sorter utilizes a 5 cubic foot floor mounted cap bin, and sorts caps as they are elevated.

Gravity forces incorrectly oriented caps to fall back into the bin for resorting. System is for higher speed sorting of flat caps where the diameter is greater than the height. Primarily for small flat caps up to 70mm.

Features

Floor level cap bin eliminates the need for ladders to reach elevated cap feeders.

Stainless steel construction.

Cap on demand sensor initiates cap feeding as needed.

Discharge height of sorter is adjustable from 72" to 96".

Cover for cap bin is available at additional cost.
