Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Stainless Steel Filler for Wash Down Capability

Inline Filling Systems FOFSEMI NT UG upgradable overflow filler is constructed of stainless steel and SS shrouded aluminum components for washdown capability. This filler frame is fully enclosed with stainless steel panels and gasketed access door.

Bottle management and filling sequence is electronically controlled entirely by the filling machine.

This FOFSEMI NT UG semi-auto filler is upgradable to fully automatic operation.

Features

LCD control panel with PLC stores up to 20 filling cycle setup parameters for recall.

No tools required nozzle mounts and multi axis bottle indexing gates for positive container control.

Batch bottle counter records number of filling cycles completed.

Automatic drip tray included as standard to protect bottles from nozzle product dripping.

Automatic conveyor mounted bottle indexing gates to control container movement.

Precision manual bottle height adjustment

No bottle / no fill (suspend operation).
