# Inline Filling Systems Pail Filling Machine

## At a Glance

- Used for bulk filling of 5-gallon pails
- By volume only
- 304 stainless steel tubular frame with NEMA 4X enclosures for full washdown capability

## Pricing

Call us at 888-318-0083

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Fill Pails by Volume

Inline Filling Systems pail fillers are used for bulk filling of 5-gallon pails by volume only. This is an economical alternative to filling pails with bulk chemical and other typical low-cost liquid products.

## Features

- 304 stainless steel tubular frame with NEMA 4X enclosures for full washdown capability.
- Filler frame top mounted supply tank with float switch control to maintain fill head pressure.
- Pneumatic operated nozzles (nozzles for sanitary applications quoted separately).
- Nozzle timing protocol is PLC controlled for high accuracy fills.
- Automatic drip tray and supply regulation.
- Precision manual bottle height adjustment.
- Automatic drain and clean cycle.
- Batch bottle counter.
- Control panel uses a 40 character two line digital display with multiple product profile menu.

Please [contact Pro Pac](#) or call 888-318-0083 for your liquid filling equipment.
