Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Pneumatic Hand-Operated Controls Fills a Wide Range of Liquids

Inline Filling Systems FPDSEMI UG automatic servo pump filler is an economical priced fully-automatic machine with excellent output, and limited ability to expand capacity in the future.

An operator is only needed for loading bottles. Bottle management and filling sequence is electronically controlled entirely by the filling machine.

Features

5,000 containers per day.
Low automatic production.

Please [contact Pro Pac](#) or call 888-318-0083 for your liquid filling equipment.
