Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fill Very Thin Chemical and Food-Grade Liquids

This Inline Filling Systems time gravity filler is best suited for water and very thin liquids whose viscosity does not change with ambient temperature or with batch variation.

This low-cost time gravity filler is ideal for many chemical and food grade products. It is especially well-suited for caustic and corrosive products where recirculation of the product is not possible.

The filling sequence is electronically controlled entirely by the filling machine. An operator is required only for handling the containers. This filler occupies a small footprint.

Fully-automatic filling machine expandable from 2 to 4 heads.

Features

PLC control with simple single button programmability offers convenient one-shot operation. Program remains in memory when power is shut off.

Constructed of stainless steel and stainless shrouded aluminum components where required for complete washdown capability.

CPVC fluid path.

Nozzle timing protocol is PLC controlled for high accuracy fills.

Diving nozzles for submerge fill.

Automatic drip tray & supply regulation.

Precision manual bottle height adjustment.

No tools required nozzle and gating mounts.

Fill heads limited to 4.
