Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Unscramble, Accumulate or Both Midstream

Inline Filling Systems bulk bottle unscrambler sorts bottles and places them on the discharge conveyor right side up at a speed that is matched with the bottling line.

The bulk bottle unscrambler integrates to efficiently sort and place random bottles from a bulk hopper onto a moving conveyor. The unscrambler standalone system installs over any existing conveyor line.

Features

Disc pre-sorter, 36" diameter.

Level sensor to control container infeed rate from any external device.

Auto-reversing disc sorter to automatically correct situations inside the disc sorter.

Orienting belt assembly adjustable for maximum bottle height of 7".

No-tool change over.

PLC/Touch screen and display.

Controls are category 4 safety rated.

Variable speed DC drives.

Photo-electric conveyor backlog control.

Unscrambler installs over your existing conveyor and discharges the containers at 34" to 38" high.
