Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Air-Cooled Bottle Induction Sealing Plastic Bottles

The Inline Filling Systems air-cooled induction sealing system heats foil/laminate liners of bottle caps for tamper evident sealing of plastic bottles. Air-cooling system eliminates the need for a water recirculator, saving floor space and expense.

Features

- Power supply with advanced IGBT circuitry.
- High-efficiency sealing head.
- Adjustable sealing head support/mount.
- Membrane control panel with digital meter and NEMA 4 rating for wash down.
- Mobile stainless steel cart with casters and leveling pads.
- Motion/foil detector group.
- LSI flashing light indicator.
