Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Easy to Integrate Conveyors Improve Efficiency

Available in rotary and inline configurations, Volumetric Technologies unscrambling tables are engineered to unscramble containers of various sizes, shapes, and materials. Designed for reliable performance and easy adjustments while being gentle on container surfaces. These unscrambling tables are high-quality, built to last.

Dynamic arms and motions gently move containers to the outside edge of the table to form a single line and are discharged one at a time, unaided, onto the conveyor of a filling, capping, or labeling line.

Features

Stainless steel construction for the toughest environments
Easy adjustable rails for containers of all sizes and shapes
Gentle on container surfaces
Variable speed

Options

Multiple table sizes
Lockable, adjustable casters
Docking mechanism
Transfer table loading

Specifications

Power Requirements: Electric varies

Speed: Adjustable up to 60 feet per minute

Wash Down: Full wash down
