Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fill, Seal, and Lid Stackable Containers Up to 3 Lanes

Volumetric Technologies high-volume rotary cup machines are designed to fill, seal, and lid stackable containers. These piston fillers are built for many industries including food, dairy, and cosmetics.

Volumetric Technologies rotary cup machines are fully automatic and can deliver up to 40 cups per minute per lane, with configurations up to 3 lanes. Equipped with a solid state PLC and a touchscreen HMI gives flexibility to configure the equipment properly for your application. All control functions are adjustable via a menu-driven operator interface.

Features

Servo-driven indexing for precision, speed, and flexibility

Ease-of-use with touchscreen HMI

No cup – no fill, no seal, no lid functionality

Stainless steel construction

Stainless steel covered base

Modular pneumatic valve bank

Extremely accurate filling up to +/- .25 of 1%

High-density cartridge heater

Digital PID temperature controls

Available in single-lane or multiple-lane designs

Options

Quick change carrier plate inserts
Piston Filler or servo rotary pump filling
Die cut foil or roll stock film sealing
Modified atmosphere
Light tower
Stainless steel guarding package
Takeaway conveyor
Multiple filler options

Specifications

Power Requirements: Air and 230V A/C Electric

Fill Volume: 0.2 ounces – 133 ounces

Speed: Up to 40 indexes per minute

Particulate Size: Up to 2.5" diameter

Wash Down: Full wash down
