Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Enhanced Wrist Load Capacity

The Fanuc M-1000iA robot, featuring a serial link mechanism, offers enhanced versatility and a wider range of motion for handling heavy loads compared to traditional parallel link robots.

Pro Pac provides custom end-of-arm tools and configurations that seamlessly integrate with Fanuc robots and the needs of any packaging line.

Specifications

Max Payload: 1000 kg

Reach: 3253 mm

Axis: 6

Wide Range of Motion in Both Vertical and Longitudinal Directions

The Fanuc M-1000iA large material handling robot can lift and manipulate heavy loads with more versatility.

The M-1000iA is Fanuc's largest robot to feature a serial link mechanism, rather than the parallel link mechanism typical of heavy payload robots. As a result, the Fanuc M-1000iA has a wider range of motion in both vertical and longitudinal directions, allowing the arm to stand upright and rotate backwards, which is impossible with parallel link robots. This capability provides users with extended versatility across a wide range of handling applications.
