Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Increased Robotic Palletizing Throughput

The Fanuc M-410 series increases throughput on palletizing and handling applications.

The Fanuc M-410iC/500 palletizing robot improves throughput and will lift 500 kg.

Pro Pac provides custom end-of-arm tools and configurations that seamlessly integrate with Fanuc robots and the needs of any packaging line.

Specifications

Max Payload: 500 kg

Reach: 3143 mm

Axis: 4

Features

Flexible Pedestal Mounting Depending on the application, the Fanuc M-410iC/500 robot can be pedestal mounted for more flexibility. The robot controller can either be housed within the pedestal, or kept separate as an independent unit.

Efficient Hollow Wrist Design Cable routing through the M-410iC/500 robot's wrist prevents snagging and increases reliability.

Unique Palletizing System Fitted with Fanuc iRVision, the Fanuc M-410iC/500 is capable of locating and handling randomly positioned boxes and other items.
