Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fast and Compact Robot

Incredibly versatile and nimble, the Fanuc M-1iA/0.5A Delta robot achieves excellent work rates on complex component assembly operations. Capable of working at any angle, the M-1iA/0.5A Delta robot is perfect for applications that demand flexibility and a high level of repeatability, such as robotic assembly and pick and place.

Specifications

Max Payload: 0.5 or 1 kg

Reach: 280 mm

Axis: 6

Six Axis Provide Fast Flexible Picking and Assembly

Flexible 3 Axis Wrist Six axis in combination with Fanuc's patented 3 axis wrist makes this robot ideal for picking or complex component assembly applications at any angle.

One Controller, Four Robots The Fanuc controller can control a maximum of four robots and additional configurations are easy to achieve.

Payload of Up to 1,000 Grams Cover an additional range of applications by adding another 500 grams payload.
