Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Long Arm Small Payload Multi-Purpose Robot

High axis speeds make the Fanuc M-710iC/50T Toploader robot extremely fast. Capable of handling 50 kg, this top mount version is the lightest Fanuc robot in the range. Offering an array of mounting options, the Fanuc M-710iC/50T Toploader robot saves space and benefits from extremely good repeatability.

The innovative M-710 series of lightweight Fanuc robots features a slim wrist, rigid arm and small footprint. High axis speeds make the M-710 series robots extremely fast.

Specifications

Max Payload: 50 kg

Reach: 1900 mm

Axis: 6

Robot for Large Work Pieces

Top Speed and Motion Performance High-speed axis, accurate and robust purpose build reducers and motors provide the Fanuc M-710 series robots with excellent performance and unparalleled reliability, repeatability, and precision to ± 0.07 millimeter.

Put It on Top Top mount robots are rail-mounted at 90° or reverse on a linear axis, making these Fanuc robots ideal for environments with reduced floor space and ceiling height restrictions.

Services Multiple Machines One Fanuc robot can service multiple vertical and/or horizontal machines to reduce your investment costs.

Faster Motor for Rail Axis The advanced Fanuc α IS30/3000 motor offers higher torque and better acceleration for even faster cycle times compared with the standard motor.
