Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

5 x 5 Dot Matrix Printer for Date Coding Cases

The Little David MicroJet I provides more control over messages than ever before and includes an area to store those that have been previously used.

The MicroJet I provides clear print on various surfaces, runs on high-speed production lines, and handles smaller boxes.

This system is ideal for those applications requiring a self-contained, non-contact coding system and product or date code identification on porous surfaces, such as corrugated containers.

Prints one line of 11/32" high 5 x 5 dot matrix print.

Features

- Prints one line of 5 x 5 dot matrix character
- 11/32" (8.7mm) character height
- Self-contained non-contact coding system
- 5 high-speed valves standard
- Messages save area: 255 with 39 fixed characters per line

Please [contact Pro Pac](#) or call 888-318-0083 for your printing and date-coding equipment.
