Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Powerful Laser Printing in Challenging Spaces

The Markem-Imaje SmartLase C600 BOU integrates into challenging spaces and offers high-quality, permanent marking in high-speed applications.

High-quality, chemical-free, permanent coding on PET bottles, glass, labels, flexible films, inked paper/carton, and coated metals like those found in the beverage industry. You can expect lower operating expenses and exceptional performance in high-speed applications right where you need it.

60 Watt Beam Orientation Unit Provides Coding Flexibility

Adaptability and Ease of Integration The Markem-Imaje SmartLase C600 BOU can be configured with up to three elbows and four tubes that come in six standard lengths to meet most installation scenarios.

Tubing lengths can be further customized to meet customers needs and can be rotated 360 degrees around their own axis, allowing for installation at the perfect angle.

Innovative and Precise Design Designed to guide the laser beam from the source to the scanning head without a loss of quality of the beam itself. The aluminum elbows are lightweight, while the stainless-steel tubes lend rigidity to the construction.

Optimizing Laser Health Sometimes it's not about tight spaces, rather more about the surrounding conditions, so the BOU allows you to get best performance and life out of your laser printer. It also can place the laser unit at a convenient and easy to access place for periodic maintenance.

Designed with Safety Top of Mind Upholds Markem-Imaje's rigorous safety standards. Adding the C600 BOU to the marking system will not compromise the factory IP55 protection.

Application Specification

High-quality coding up to 150,000 products/hour.

Proven robust industrial design with IP55 protection.

Efficient extraction system with automatic flow control optimized for high-speed coding (ES500+ solution).

Material Types

Seal wrappers
Seal bags
Pouches
Plastic films
Pipes
Jars
Hoses
Customized packages
Containers
Caps
Cables
Bulbs
Bottles

Industries

Soft drinks
Snack food
Pharmaceuticals
Pet food
Personal care
Oil and gas
Industrial components
Food
Extrusion
Electronics
Dairy
Cosmetics
Confectionery
Beverage
Beer & cider
