Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Heavy-Duty Vertical Band Sealer for Tough Bag Materials

The APM VBS-3/8 DH-10 heavy-duty band sealer is designed with two 5" heating sections (10" total) and two 5" cooling sections (10" total) for excellence in sealing pouch and bag materials that can be challenging to seal.

Features

Speeds up to 45' per minute with constant secure seals of 1/8", 1/4", or 3/8" wide

With no bag top trimmer

Dual temperature controls maintain consistent heat and assures quality hermetic seals

Heat is generated from front and rear heaters or one set only as required using a simple on/off switch

Individual heating assemblies can be regulated because of dual controls

Designed with two 5" heating sections (10" total) and two 5" cooling sections (10" total) for greater flexibility in product sealing of difficult materials

Sealing temperatures up to 450F

Seals are achieved through the use of special heavy-duty wear-resistant laminated Teflon bands

Mounted on a heavy duty floor stand

Adjustable height sealing assembly with crank-handle

Can be positioned over existing lower support conveyor

Chassis sealing assembly construction of stainless steel shafting throughout and anodized aluminum assuring longevity of use

Chrome-plated sealing assemblies reduces wear

USDA approved

Supported Bag Materials

Polyethylene
Polypropylene
Kraft/PE
Tyvek
Polymylar
Foil/PE
Polylaminates
Nylon

Specifications

Electrical: 110 VAC, 10 amps, 60 cycle
