Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Two Sealing Heads to Seal Above and Below the Bag Handle

The APM VCBS-1/4 dual head vertical rotary band sealing system is designed for big-box retail bags that require two seals; one above the bag's carry handle and one below it. The support conveyor carries the bag through both seal heads in one operation.

Features

6"W x 5'L interfaced variable speed support conveyor with fully adjustable stainless steel guide rails

Adjustable height sealing assembly floor stand with crank handle

Variable speeds up to 540 inches per minute (45 fpm)

Ultra-quiet gear motor

Special heavy-duty wear-resistant laminated Teflon bands produce quality 1/8", 1/4", or 3/8" seals

Digital temperature control with PID Autotune maintains consistent heat and assures consistently hermetic seals

5" long heating zone and 5" long cooling zone provides flexibility in sealing of difficult materials

Sealing temperatures up to 500F

Hard chrome-plated sealing bars followed by nickel-plated cooling bars provide maximum wear resistance

USDA approved

Options

Infeed conveyor supports heavy or bulky packages for final seal and trim
Optional one or two line embossing coder for product marking
Casters for easy positioning

Supported Bag Materials

Polyethylene
Polypropylene
Tyvek
Foil/PE
Polylaminates
Nylon
Coextrusion
Poly-coated paper materials

Specifications

Electrical: 110 VAC, 10 amps, 60 cycle
Air: No compressed air required
