Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Heavy-Duty Band Sealer for Products Over 1 Pound

The APM VCBS-3/8 vertical conveyorized band sealer is the industry standard for reliably sealing just about any bagged product in all kinds of bag materials. The synchronized support conveyor carries products over 1 pound through the seal head assembly.

Features

6"W x 5'L interfaced variable speed support conveyor with fully adjustable stainless steel guide rails

Adjustable height sealing assembly floor stand with crank handle

Variable speeds up to 540 inches per minute (45 fpm)

Ultra-quiet gear motor

Special heavy duty wear-resistant laminated Teflon bands produce quality 1/8", 1/4", or 3/8" seals

Digital temperature control with PID Autotune maintains consistent heat and assures consistently hermetic seals

5" long heating zone and 5" long cooling zone provides flexibility in sealing of difficult materials

Sealing temperatures up to 450F

Hard chrome-plated sealing bars followed by nickel-plated cooling bars provide maximum wear resistance

USDA approved

Options

Faster drive motor
Roller infeed conveyor for easy product loading
Embossing coder or hot ink printer for product marking
Casters for easy positioning

Supported Bag Materials

Polyethylene
Polypropylene
Tyvek
Foil/PE
Polylaminates
Nylon
Coextrusion
Poly-coated paper materials
