Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Tabletop Impulse Bag Sealing with Gas Flushing

Emplex VacPack VS1 impulse sealers are robust, stainless steel food grade sealers that create a modified atmosphere package for a wide range of product sizes.

VacPack sealers employ an ejector style vacuum pump and produce hermetically sealed packages on any heat sealable bag up to 12 mil/300 micron in thickness (6 mil/150 micron maximum when gusseted).

The vacuum and nitrogen gas flush system removes oxygen, resulting in longer shelf life, product integrity, and protection against discoloration. The gas flush system can create a cushion-like buffer against damage.

Features

Small footprint

Standalone flexibility

Plug and play

All machines tested to ANSI/PMMI B-155.1-2000 and CE marking standards

All parts UL/CSA approved

Controller

4.3" color touchscreen controller on adjustable angled base

Recipe management and selection for different materials and products

Options

Additional nozzles
Extended seal length
Product shelf
Washdown NEMA 4 or 4x construction
Floor stand with adjustable angle
