Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Ultimate Band Sealer for Speed, Strength and Precision

The QuantumPak Q1200 advanced bag sealer is engineered for maximum precision and performance. This industrial band sealer utilizes PLC controls for consistent, repeatable results, and features a 7" HD color touchscreen for intuitive operation.

Three independent heating zones and three cooling zones ensure optimal seal integrity, even on challenging materials. Built on a reinforced stainless steel stand with heavy-duty locking casters, the QuantumPak Q1200 offers an adjustable sealer height to accommodate bags up to 30" tall. Higher sealer options are available for taller bags.

With a sealing speed of up to 1200 inches per minute, the Q1200 band sealer is designed for high-output production demands, requiring both speed and reliability.

The QuantumPak Q1200 is the ultimate choice for operations demanding speed, strength and precision in one rugged solution.

Features

Easy to use digital controls

3 independent heating zones and 3 cooling zones

Detachable seal module for faster changing of the seal bands/seal widths

7" HMI touchscreen for easy, intuitive operation

Reinforced stainless steel stand with heavy-duty casters

Heavy-duty gear box
Available seal widths: 6, 8, 12 and 16mm

Construction

Stainless steel modular frame
Heavy-duty gear box
Direct drive, no timing belts
Rugged stainless steel control box construction
Locking heavy-duty stainless steel 4" diameter casters
Rugged reinforced caster mounts
USA manufactured controller and motors

Specifications

Max Speed: 1200 inches per minute
Max Temperature: 420° F
Max Bag Height: 30"

Options

Gas flush capability
Heavy-duty conveyor
Taller bag height capability
NEMA4 construction
Bag top trimmer
Bag top compression
Automatic zipper closure
Heat and seal validation
TIJ or CIJ printer
