Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Quickly Accurately Bag Bulk Items

The Rennco Bulk Packaging System is an automatic vertical bagging system that provides consistent and continuous production for many items that require bulk packaging including bottle caps, lottery pogs, puzzle pieces.

The Bulk Packaging System easily interfaces with scales, counters and/or feeders for automatic loading.

Multiple items are loaded into the web of film. Once the correct weight or count is achieved, the bag is produced. With gating mechanisms, the upstream loading continues while the bag is being made, maximizing output capacity.

Specifications

Package size: Up to a 24" x 52" bag
Product Size: Up to 18 lbs of product per bag
