Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Quickly Count, Accumulate, and Load Stacks of Cups

If you are looking for a quick and efficient way to count and load cups, the Rennco CCL Cup Counter & Loader is the perfect solution. The CCL can be a stand alone unit to just count and strip stacks of cups, or interface the CCL with a Rennco Vertical L-Bar Sealer for a complete counting and bagging solution.

The Rennco CCL Cup Counter & Loader will accept paper, thermoformed, and selected injection molded and foam cups.

The CCL accepts a single line of nested cups from a continuous source. Cups are counted utilizing fiber optic sensors and then transferred to a Rennco packager via conveyor. Incorrect stack counts are automatically removed from the system for quality assurance.

## Specifications

Package size: 1 to 6 stacks of cups per bag

Product Size: 2 3/4" to 4 7/8" diameter, 8" to 32" stack length
