# Rennco SPS Lid Packaging System

## At a Glance

- Receives thermoformed and injection molded lids
- Complete automation or simple hand load infeed system
- Automated integration from trim press via trim press interface

## Pricing

Call us at 888-318-0083

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Package Lids Precisely and Quickly

The Rennco SPS Lid Packaging System is a superior lid packaging system with features that ensure product quality.

The Rennco SPS accepts both thermoformed and injection molded lids. Stacks of these lids are placed into conveyor pockets, either automatically or manually. The stacks are transported to a Rennco Vertical L-Bar Sealer using a servo-driven conveyor. A servo-driven pusher then gently places the stack of lids into the sealer.

The Rennco SPS Lid Packaging System uses a completely automated integration from the trim press by means of a trim press interface unit. If complete automation is not required, a simple hand load infeed conveyor system can be utilized for cost savings of the bagging operation.

## Specifications

Package size: Up to a 100 products per package

Product Size: 2.75" to 7" diameter, up to 28" stack length

Speed: Up to 26 packages per minute

Electrical: 240 Volt, 1 Phase, 60 Hz

## Options

Easy open perforator

Horizontal discharge conveyor

Film cart

Film registration  
1/4" hole punch - single, double or triple punch  
Large trim wind up  
Trimless seal arrangement  
Powered film cradle  
Spare parts kit  
Spare sealing assembly  
Static eliminator  
Transformer  
Discharge conveyors (multiple sizes)  
Pin perforator assembly  
Trim break detection eye  
Servo film feed
