Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Receive and Convey Foam and Rigid Products from Trim Presses

The Rennco SPS Tray Packaging System is perfect for companies looking to increase production rates. The SPS receives product from the trim presses and manufacturing lines of both foam and rigid plastic products. The speed on the SPS Tray Packaging System is proven to run consistent with the output of most thermoformers.

This SPS pocket conveyor system is easy to use and allows quick change-over when multiple sizes of products are run.

Pro Pac provides Rennco systems that count, transfer, and package foam trays and polypropylene/polystyrene containers, as well as systems that will collate and overwrap multiple packages.

## Specifications

Package size: Up to a 24" x 52" bag

Product Size: Up to 40" stack length

Speed: Consistent with the output of most thermoformers

Electrical: 240 Volt, 1 Phase, 60 Hz
