Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Automatically Bag Your Products Around the Clock

Built with Rennco's rigorous standards, including welded tubular construction, the Voyager Automatic Vertical L-Bar Sealer will meet your most demanding 24/7 production requirements.

Run fast, up to 60 packages per minute.

Save floor space. This vertical L bar sealer is about half the size of automatic horizontal L-bar sealers.

PLC controlled with a touch screen operator interface panel that is simple to navigate and easy to change machine settings. The panel is mounted on a swivel arm that can be moved for operator convenience.

Powered film cradle accommodates a big 16" film roll diameter for less down time. Quick and easy to thread, accepting A or B wind film. The film cradle has a servo driven film feed and adjustable film guide which makes this sealer basically tool-less for package size change-over.
