Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Quickly Bag Multiple Loose Items in a Small Footprint

The Rennco 201 PP Pouch Pack Vertical L-Bar Sealer has a small 3' x 3.5' foot print like the Rennco 201. However the 201 PP Pouch Pack version has a different sealing orientation. The horizontal seal bar is below the vertical seal allowing for bagging multiple loose items. The items are fed to the packager via an infeed chute that can be hand loaded or automatically fed from an upstream system.

The Rennco 201 PP pouch packager is ideal for kit packaging multiple items in bags up to a 8" x 10".

A variety of optional features are available such as static eliminator, film registration eye, pin perforator assembly, trim break detection eye, and more. Bucket infeed conveyors are available to automate the loading process for integration with upstream feeding equipment.

Benefits

- Up to 35 bags per minute
- Versatile packager for smaller products up to 8" x 10"
- Small footprint pouch pack and kit packing system
- Significant material cost-savings over pre-made bags
- Easily interfaced with infeed systems
- Many available options

Features

Constant coated seal system
Leg and height adjustments
Casters
Light screen cycling mechanism and perimeter interlocked guarding
Trim wind up

Options

Bucket horizontal conveyor
Easy open perforator
Header sealer HS-10
Header sealer HS-14
Horizontal discharge conveyor
1/4" hole punch
Oblong hole punch
Jaw guards
Pick and place removal system
Uptime seal jaw
Pin perforator
Electric eye film registration
Spare assemblies and parts kits
Static eliminator
Transformer
12" discharge conveyor
Trim break detection eye
Servo film feed
Bag release for lightweight product
