Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Quickly Bag Odd-Shaped Products

With a small 3' x 3.5' foot print, the Rennco 201 Vertical L-Bar Sealer is a superior bagging system for small items.

The Rennco 201 easily interfaces with infeed systems, and allows for significant cost savings over systems that run pre-made bags. Because film travels vertically through the Rennco 201 Sealer, you can easily package odd sizes and shapes in shrink-wrap or in poly bags - products like broccoli, footballs, dog bones, etc.

The Rennco 201 is ideal for packaging products in bags up to a 8" x 10".

All Rennco Vertical L Bar Sealers are equipped with a constantly-heated, coated seal bar sealing assembly for smokeless, odorless sealing. This unique sealing system seals polyethylene and polyolefin films without change parts allowing customers the flexibility to use both films.

Benefits

- Up to 35 bags per minute
- Versatile packager for smaller products up to 8" x 10"
- Small footprint pouch pack and kit packing system
- Significant material cost-savings over pre-made bags
- Easily interfaced with infeed systems
- Many available options

Features

Constant coated seal system

Leg and height adjustments

Casters

Light screen cycling mechanism and perimeter interlocked guarding

Trim wind up

Example Products

License plates

Dog bones

Filters

Bath bombs/soap balls

Silverware kits

Syringes

Clamps

Options

Easy open perforator

Header sealer HS-10

Header sealer HS-14

Horizontal discharge conveyor

1/4" hole punch

Oblong hole punch

Jaw guards

Pick & place removal system

Uptime seal jaw

Pin perforator

Electric eye film registration

Spare assemblies & parts kits

Static eliminator

Transformer

12" discharge conveyor

Trim break detection eye

Servo film feed

Bag release for lightweight product
