Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## All Electric Bagger, No Air Required

The Rennco E-Pac Vertical L-Bar Sealer is an all electric, versatile, easy-to-use vertical bagging machine. The E-Pac features servo motor drives for film feed and seal assembly open/close. As with all Rennco vertical L bar sealers, this model is equipped with a constantly heated, coated seal bar sealing assembly for smokeless, odorless sealing of polyethylene and polyolefin films.

The Rennco E-Pac is ideal for packaging products in bags up to a 14" x 20".

The E-Pac makes a bag around a product using centerfolded polyethylene or polyolefin roll stock. Because of the vertical film path, this bagging machine is ideal for cylindrical items and odd shaped products.

All E-Pac machine functions such as bag length, seal opening, heater settings, dwell time, etc. are controlled from the operator interface panel. The E-Pac is supplied with a light screen cycling system, lexan interlocked perimeter guarding, and locking casters.

## Benefits

- All electric, no compressed air required
- 110V plug-in-anywhere convenience
- Servo seal jaw operation
- Servo film feed operation
- User-friendly HMI and programmable changeover
- Quiet operation

## Features

Uptime seal jaw  
Adjustable jaw opening  
Tool-less film guides  
Leg and height adjustments  
Casters  
Light screen cycling mechanism and perimeter interlocked guarding  
Tri bar seal system  
Trim wind up  
Servo film feed  
Pin perforator

## Options

1/4" hole punch  
Spare parts kit  
12"W x 72"L inclined discharge conveyor  
18"W x 72"L integrated discharge conveyor  
Constant coated seal system  
Jaw guards  
Discharge conveyors  
Electric eye film registration  
Header sealer  
Static eliminator  
Spare assemblies and parts kits
