Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Shrink Bundling Up to 80 Packages per Minute

Kayat 601-T and 801-T continuous-motion shrink bundling systems are designed for beverage, food and non-food industries. Built to handle a wide range of products, these shrink systems wrap up to 60 and 80 packs per minute, respectively.

Servo controls allow for a tool-less changeover to other container sizes and formats.

These shrink bundling machines wrap pre-formed trays of product with shrink film. Bottom overlap seal technology is utilized for stronger and better product presentation. Printed, registered film handling can be selected as an option.

The absence of seal bar provides the machine with very low maintenance, less downtime and minimum moving parts. Only one film roll is required. Both machines are equipped with a second film mandrel with a quick splice feature to ensure minimal down-time when changing film rolls. The PLC controlled servo-driven film cut, film feed and film wrap ensures perfect synchronization of machine components.

## Standard

Allen Bradley Servo drives film cut, film feed and film wrap ensures perfect synchronization of machine components

Film blower adjustment package

Quick changeover to other sizes by servo driven controls

Easy operation and maintenance through operator interface

Right or left hand operator station as preferred  
Accommodation for second 20" roll of film and weld bar for fast film splicing  
Highly efficient heat tunnel with 4" of high temperature insulation and Watlow SCR Solid state power stage  
Tunnel clear out capability in the event of power failure  
Allen Bradley three color stack light display  
Lighted area surrounding the film feed/shear assembly  
UL approved panel, including appropriate labeling  
One complete set of machine documentation and manuals  
Static bar

## Features and Benefits

Heavy-duty rugged construction  
Centralized lubrication system  
Automatic speed regulation  
Simple operation is provided by a full color panel view  
Compact footprint  
Easy integration to other equipment  
Dual roll film mandrels for quick film changeover

## Options

Spare parts kit  
UL Listed or CSA Listed  
Special elevation parts  
NEMA 4X control panel, junction boxes  
Siemens controls available upon request  
Film loading dolly  
Option to handle printed and registered film  
Cooling fan at tunnel discharge

## Industries

Beverages  
Canned goods  
Bottles  
Jugs  
Trays

## Pack Sizes

	Width	Length	Height
Min	5" / 127mm	5" / 127mm	1.75" / 44mm
Max	20" / 508mm	15" / 381mm	13" / 330mm
