Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Shrink Bundling Up to 80 Unstacked Packs per Minute

Kayat 801/802-TGS continuous motion shrink bundling systems are designed for the beverage, food and non-food industries. The 801/802-TGS can both collate and wrap multiple formats of product with shrink film. The Innopack 802-TGS bundlers use bottom overlap seal technology providing better product presentation.

Designed to handle a wide range of products, these heavy-duty shrink bundling systems can wrap up to 80 unstacked packs per minute. These bundlers can stack and pack at 60 cases in and 30 cases out.

Features and Benefits

Stand-alone machine

Compact footprint saves floor space over individual stacker and shrink wrapper

Servo controlled stacker for accurate height and placement of packs

Easily connects to tray packers, conveyors or other machinery in the line

Dual roll film mandrels for quick film splice

The PLC controlled servo-driven film cut, film feed and film wrap assure perfect synchronization of machine components

The absence of a seal bar provides a machine with very low maintenance, less down time and minimum of moving parts

Printed and registered film handling can be selected as an option

Compact footprint

Stacking capability
Dual lane capability
Simple to use and operate
Available in LH and RH configurations
Accommodates two film rolls for quick film splice

Packages

Single lane pre-formed trays
Dual lane pre-formed trays
Bundles
Stacked single lane
Pre-formed trays or bundles

Output Speed

Unstacked: 80 per minute
Stacked: 30 per minute

Options

Print-registered film operation
Discharge cooling fan
Elevation parts

Industries

Unstacked trays of cans or bottles
Stacked trays of cans or bottles
Bundles of cans or bottles
Staggered bundles of bottles

802-TGS Pack Sizes
