# Polypack CFH High-Speed Total Closure Shrink Bundler

## At a Glance

- High-speed total closure shrink bundling
- Automatic inline production
- Automatic product collation, orientation, rotation & stacking
- Production rates up to 100 cycles per minute

## Pricing

Call us at 888-318-0083

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## High-Speed Total Closure Bundled Products

The Polypack FH/CFH shrink-bundler machine series provides retail-ready, total closure shrink bundles.

The Polypack FH/CFH total closure shrink wrapping machines can be configured to run in intermittent or continuous motion. As with all Polypack packaging solutions, these shrink wrappers can be highly customized to meet the specifications of your unique secondary packaging application.

## Highly Versatile Bundling Equipment

Available with intermittent motion or high-speed sealing, the Polypack FH/CFH shrink wrapping series uses a forming head to produce a "total closure" overwrap product bundling. Total closure increases product protection and resistance to warehouse conditions.

Polypack FH/CFH shrink wrappers can also be designed to run printed shrink film (registered or random print) for retail ready packaging applications.

This shrink wrap machine series has automatic product collation assemblies that divide, reorient, rotate, upend, group, or stack products.

## Features

Intermittent or continuous motion  
Inline, side, or pusher infeed

Total closure Overwrap  
Retail ready packaging  
Option for nested pack  
Single-roll LDPE or POF  
Option for printed film  
Horizontal or vertical seal bar  
Option for dual or triple seal bar  
Wraps individual product, pad/tray, or multipacks  
Multiple seal bar models for high-speed applications
