Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## High-Speed Total Closure Bundled Products

Polypack CFH retail shrink bundlers are continuous motion, high-speed total closure shrink wrap machines.

Using a forming head to multi-pack a variety of products, shrink-wrapped bundles are sealed on all sides for increased product protection. Total closure multi-packs are more resistant to mishandling and warehouse conditions than bulls-eye closure. Total closure present a nice, continuous surface for retail packaging applications.

## Highly Versatile Bundling Equipment

Polypack CFH retail shrink bundlers provide complete enclosure of bundles with polyethylene, polyolefin, or PVC films. These shrink wrap machines can also handle print registered film for retail packaging.

These high-speed shrink bundlers operate at speeds up to 70 cycles per minute, and are available in both horizontal and vertical sealbar configurations. For cylindrical products, an integrated label orientation system is available for shelf-ready packaging that engages consumers head-on.

## Features

- High-speed, continuous-motion sealing total closure wraps
- Automatic inline production
- Production rates up to 70 cycles per minute
- Multiple seal bar models available for high-speed applications

Horizontal or vertical seal bar assemblies

Automatic product collation, orientation, rotation & stacking

Wraps individual product, pad/tray, or multi-packs

Capable of running print registered film for retail shrink wrapper applications (optional)
