Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Wrap Individual Products and Collate Multi-Packs into Bundles

Polypack Pharma intermittent-motion shrink bundlers integrate state-of-the-art design, construction, operation and safety features.

Designed to collate and shrink wrap nutraceutical, pharmaceutical, and personal care products, this Polypack Pharma shrink bundler uses a motorized pusher to provide smooth, positive transfers to multi-pack small bottles, vials, medicine cartons, medical tubes, and other medical, pharmaceutical and nutraceutical packages of different shapes and sizes.

At less than 8' long, this compact shrink bundler is designed to collate and shrink wrap pharmaceutical products at speeds up to 80 bundles per minute.

The versatile Polypack Pharma shrink bundling systems have a self-adjusting, solid stainless steel rod tunnel conveyor, which means no belts and no coatings. With no change parts these machines are durable, long-lasting, and easy to change over and maintain.

## Polypack Pharma Series Key Points

- Inline, offset, or side infeed
- Optional dual lane (PH)
- Open-sided (bullseye) enclosure
- Dual-roll LDPE
- Optional cradle with spare roll

Horizontal seal bar

## Features

Heavy-gauge, stainless steel construction

No change parts

Quick, tool-free changeovers

Self-leveling, Teflon coated hot knife sealbar assembly

Side or curved infeed options

Pre-programmed collation modules

Self-adjusting solid stainless steel rod tunnel conveyor (no belts or coatings)

Engineered as a single unit with integrated double insulated tunnel to reduce energy consumption

Polycarbonate enclosures ensure safety and easy access to machine components

PLC touchscreen interface

## Options

High-speed model with a footprint just under 10 feet

Various infeed modules

Stabilizing modules and guides for unstable products

Collation modules for dividing, reorientation, and stacking

Integrated pad dispenser to create pad-supported shrink packs
