Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Industrial Strength Shrink Bundling Systems

TexWrap Kayat SRX continuous motion shrink bundlers wrap loose products or trays in clear or print registered film at moderate to high speeds.

Texwrap Kayat SRX shrink systems are single roll shrink bundlers. These shrink bundlers can wrap loose product without support trays or pads, product arriving in trays, or includes capabilities to pack loose product into trays to wrap in film.

Texwrap SRX bundling systems use bottom overlap technology for strong seals and the ability to showcase printed film graphics. Designed to handle a wide variety of packaged food and beverage products, Texwrap SRX bundlers use a single roll of clear or printed film, with speeds up to 60 cycles per minute.

These bundling systems are designed and manufactured with a robust, industrial design and provide easy access for operation and maintenance.

Features & Benefits

Toolless Adjustable Wrap Bar Assembly Easily adjust wrap zone for package height with no change parts.

Easy Access Film Feed & Cut Slide out film feed and cut assembly for easy maintenance.

Film Bundles with clear or print registered film.

State-of-the-Art Air Flow Control Easily adjust air flow to create the most appealing appearance on the end product.

Allen-Bradley Controls Package Includes predictive maintenance flags for common wear parts.

Dual Roll Film Mandrels Manual splice minimizes roll to roll changeover time.
