Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

High-Quality Shrink Performance with Self-Contained Steam Generator

Designed for efficient full-body shrink applications, Axon HE-500 stand-alone steam shrink tunnels offer high-quality shrink performance that only steam can provide with the convenience of an integrated, self-contained steam generator.

Axon HE-500 steam tunnels eliminate the need for costly centralized steam generation systems. When supplied with water and electricity, Axon HE-500 systems automatically generate high-quality, low-pressure steam.

Though built for stand alone operations, the HE-500 also offers seamless integration with shrink applicators and downstream equipment.

Container changeover is toolless, simple, intuitive and repeatable.

Features & Benefits

Size range flexibility - Container or multi-pack diameters up to 5" and heights up to 9.5".

Tool-less size changeovers - Fast, simple container changeovers increase uptime and enhance productivity.

Stainless steel construction - Durable, easy to clean, easy to maintain.

Adjustable steam distribution - 16 perforated steam bars that are easily adjustable to achieve optimum shrink results.

Applications

The Axon HE-500 offers the flexibility to perform five important shrink applications.

Tamper evident bands

Partial body sleeves

Full body sleeves
