Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Maximize Uptime with On-the-Fly Splicing!

The Tripack FT-300 Film Accumulator is a robust film carriage system that provides on-the-fly, roll-to-roll splicing.

A stand-alone controlled machine, capable of marrying up with any brand of high-speed sleeve applicator. Unlike most film accumulators that require a series of dancer bar film threading, the FT-300 is a simple, no thread design, making setup and maintenance safe and easy.

## Features of FT-300

360° placement

Trough holds up to 300 feet of film for splicing on the fly

Stand-alone power enclosure

Heavy-duty stainless steel frame with adjustable feet and casters

Diamond plate transfer bridge to applicator

Powered film unwind

Zero-tension film air box

Operator splice table and film-locking station

Dual-film loading station

Low film and no film technology to eliminate re-threading process

Enhanced guarding package for extra safety
