Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Product Separation with Minimum Film Width

Versatile belted indexing infeed with product separation conveyor. Design permits minimum film width requirements for belted feeding systems.

Benefits of the Omni Modular Plug-and-Play Infeed System

Allows you to purchase different stand-alone infeed modules to meet changing product and/or process needs rather than purchasing a complete new wrapper for each new application.

Contract packagers are able to change infeeds to support varying packaging applications without the investment of purchasing a complete new system, allowing them to be more competitive and responsive.

Please [contact Pro Pac](#) or call 888-318-0083 for your shrink equipment.
