# Texwrap EPS Continuous Motion Packaging Systems

## At a Glance

- For fast paced shrink-to-stock or shrink-to-ship facilities
- Measures dimensions of each product entering the wrapper
- Labeler automates placement of shipping label

## Pricing

Call us at 888-318-0083

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Wrap-to-Ship and Wrap-to-Stock Bagging System

Texwrap EPS continuous motion packaging systems are specifically designed for wrap-to-ship or wrap-to-stock applications.

These EPS systems accurately measure the dimensions of each product allowing an infinite number of SKUs to enter the wrapper.

These EPS bagging systems can be fully integrated to optimize automated mailing to significantly reduce labor and material costs. For higher speeds and more automation, Texwrap EPS continuous motion packaging systems are based on Texwrap continuous motion side sealers.

Texwrap EPS bagging systems can accommodate shrink or non-shrink applications using either printed or clear film. Integrated labeling using ID Technology's printer applicator can be added to automatically print and apply shipping labels.

## Benefits

- Ideal for fast paced shrink-to-stock or shrink-to-ship environments.
- Accurately measures dimensions of each product allowing an infinite number of SKUs to enter the wrapper.
- CSS series accommodates both printed and clear film.
- Flexible for shrink and non-shrink applications.
- Incorporates with multi-zone shrink tunnel for shrink packaging applications.

- For wrap-to-ship applications, ID Technology printer applicator is easily added.

## Features

**Photo Eye Measurement** Advanced photo eyes accurately measure the product dimensions to create the perfectly sized package every time.

**Integrated Labeling System** Integrated high-quality ID Technology labeler automates placement of shipping label.

**Smart Scan Technology** Detects if a package is removed from the sequence after scanning and stops the machine, ensuring products are shipped to correct customers.

**Fully-Automatic Solutions** Fully automatic solutions can be installed at the end of existing lines and run without human interaction.

## EPSB-2011

The Texwrap EPSB-2011 e-commerce bagging system creates right-sized product bags for both wrap-to-ship and wrap-to-stock applications. The EPSB-2011 can run opaque or clear film. This bagging system can be configured with an optional integrated ID Tech labeling system to print address labels.

- Accurately measures dimensions of each product allowing an infinite number of SKUs to enter the wrapper.
- Creates a right-sized film bag around input product for shipping.
- Integrated labeling system with ID Technology printer for wrap-to-ship applications.

## EPSS-2011

The Texwrap EPSS-2011 e-commerce bagging system creates right-sized product bags for both wrap-to-ship and wrap-to-stock applications. The EPSS-2011 can run opaque film where product discretion is desired. This bagging system can be configured with an integrated ID Tech labeling system to print address labels.

- Accurately measures dimensions of each product allowing an infinite number of SKUs to enter the wrapper.
- Creates a right-sized film bag around input product for shipping.
- Optional label applicator included for shipment identification through shrink process.
- Multi-zone three-chamber tunnel offers air flow and air direction controls for each zone to shrink film into an aesthetically pleasing package.
- Integrated labeling system with ID Technology printer for wrap-to-ship applications.
