Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Intermittent Wrap-to-Ship Bagging System

Texwrap EPS intermittent motion packaging systems create ready-to-ship custom-sized mail packages for high-demand e-commerce businesses.

Producing up to 20 packages per minute, the Texwrap EPSB-3322 is significantly faster than manual operations.

Texwrap EPS bagging systems create ready-to-ship custom-sized mail packages in a unique operation capable of integration with a labeler and multi-carrier shipping software.

Texwrap e-commerce packaging systems deliver increased throughput, decreased DIM weight freight costs, and a reduction of up to 50 percent on material costs.

Benefits

- Accommodates a wide range of product sizes.
- SmartTrack helps prevent order fulfillment errors.
- Produces up to 20 mailers per minute.
- Advanced photo eyes accurately measure the product dimensions to create the perfectly sized mailer every time.
- Reduces manual packing labor costs.
- Significant reduces material costs vs pre-made bags.
- By minimizing packaging, dimensional weight freight costs are reduced.

Features

Photo Eye Measurement Advanced photo eyes accurately measure the product dimensions to create the perfectly sized package every time.

Integrated Labeling System Integrated high-quality ID Technology labeler automates placement of shipping label.

Smart Scan Technology Detects if a package is removed from the sequence after scanning and stops the machine, ensuring products are shipped to correct customers.

Fully-Automatic Solutions Fully automatic solutions can be installed at the end of existing lines and run without human interaction.

EPSB-3322

The Texwrap EPSB-3322 e-Commerce solution creates a right-sized bag for product for both wrap-to-ship and wrap-to-stock applications. The EPSB-3322 can run opaque or clear film depending. This bagging system can be configured with an optional integrated ID Tech labeling system to print address labels.

- Accurately measures dimensions of each product allowing an infinite number of SKUs to enter the wrapper.
- Creates a right-sized film bag around input product for shipping.
- Integrated labeling system with ID Technology printer for wrap-to-ship applications.
