Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

High-Profile with No Need for Operators to Attach and Cut the Stretch Film

Designed for fork lift loading, the Orion HPA high-profile stretch wrapper starts with lanyard or remote control for maximum efficiency.

Orion HPA wrappers eliminate the need for operators to attach and cut the stretch film. Simply place the pallet load on the machine, and pull a lanyard switch while backing away. The machine will perform the entire wrap cycle automatically without the need for an operator to tie the film tail to the load at the beginning of the cycle, and detach it at the end. This will greatly impact the efficiency of your stretch packaging operation allowing operators to stay productive while the machine is wrapping.

The Orion HPA wrappers are forklift portable from front or rear. The maximum load weight capacity for the Flex HPA Series is 5,000 pounds. The 48" x 48" turntable handles loads up to 50" x 50". With an octagonal turntable for easy forklift loading, the HPA Flex Series ensure product safety and security.

Features on the Orion LPA

Automatic wrap cycle for operator efficiency
7" IntelVue color, HD touch screen HMI
15 RPM variable speed with soft start
5,000 lb maximum load weight capacity
Film saving 260% powered film pre-stretch
