# Orion MCBA Manual Corner Board Applicator

## At a Glance

- Apply cornerboards to pallet loads in a safe and efficient manner
- For use on Orion FA automatic turntable wrapper
- Pallet loads are slowly turned for corner boards to be manually applied as film is wrapped

## Pricing

Call us at 888-318-0083

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Safe, Efficient Manual Application of Corner Boards

This option is available on the Orion FA automatic turntable stretch wrapper and is designed for customers who require operators to apply cornerboards to pallet loads in a safe and efficient manner.

When pallets are placed onto a turntable, the operator stands in the operator booth. Slowly, the pallet load will begin to spin so that each cornerboard can be manually placed. Once this is complete, the turntable stretch wrapper speeds up. When complete, the pallet is sent forward on the conveyor.

## Features

- For use on Orion FA automatic turntable wrapper
- Allows for safe manual application of corner boards
- Built-in safety systems assure safe operation
- Machine operates in slow mode until operator has completed application
- Once operator steps off platform, machine accelerates to normal speed
- Possible retrofit depending on equipment in use

Please [contact Pro Pac](#) or call 888-318-0083 for your stretch wrapping equipment.
