Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Stretch Wrap Roll Products in a Cocoon Wrap Pattern

The Orion RW-44 heavy-duty semi-automatic wrapping system is designed to stretch wrap roll products by turning the roll on steel blocking rollers while spinning the product on a 14 RPM turntable. This creates a cocoon wrap pattern and provides complete protection and unitization of the roll.

Safety features include a pneumatically operated shaft to keep the turntable in place, turntable support, structural steel framing, and more.

Maximum load size is 60" Diameter x 65" Length. Maximum load weight is 6,000 pounds.

Please [contact Pro Pac](#) or call 888-318-0083 for your stretch wrapping equipment.
