Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Efficient Stretch Wrapping for Long, Narrow Products

Robopac Compacta semi-automatic horizontal stretch wrappers are built for efficient bundling of long, narrow products such as wood molding, aluminum extrusions, plastic profiles, tubing, textiles, and carpet.

These Robopac wrappers offer reliable performance in compact footprints, making them ideal for various manufacturing and packaging environments.

All Robopac Compacta Ring Wrappers Feature constant film tensioning to improve package integrity and reduce film breaks. Are equipped with safety options that adhere to rigorous CE safety standards.

Benefits

Semi-Automatic Operation Simplifies the wrapping process with minimal operator input

Automatic Film Clamp & Cut Ensures safe, hands-free transitions between cycles

Constant Film Tensioning Enhances wrap consistency and reduces film breaks

Versatile Product Handling Perfect for light and rigid materials of varying lengths

Features

Film Carriage Unit The roll carriage unit has an adjustable, direct breaking transmission roller. The roll

carriage eases loading and film insertion. The roll carriage is equipped with locking and quick roll release.

Cutting and Clamping Unit Automatic highly reliable dual rod clamping and cutting system fully automates the wrapping process.

Start and Stop Pedal Foot pedal safely starts the system wrapping program.
