Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Suspension Stretch Wrap Packaging for Semi-Finished Products

Robopac Compacta SPG horizontal stretch wrappers are designed to securely package semi-finished products using advanced Suspension Packaging Grip (SPG) technology. This Robopac stretch wrapper increases packaging speed while providing maximum protection and product stability.

Whether you are packaging metal products, extrusions, or delicate assemblies, Robopac Compacta SPG horizontal stretch wrappers offer the efficiency and security your operation needs.

**All Robopac Compacta Ring Wrappers** Feature constant film tensioning to improve package integrity and reduce film breaks. Are equipped with safety options that adhere to rigorous CE safety standards.

## Benefits

**Ideal for Semi-Finished Products** Wrap components securely for transport or storage

**SPG Technology** Delivers tight, protective film application

**Efficient & Reliable** Boost throughput without sacrificing package integrity

**Compacta Performance** Built to Robopac's high standards for durability and ease of use

## Features

**SPG Conveyors** Horizontal motorized roller conveyors ensure the product's correct entry for optimal

wrapping.

**Color Touch Screen** Redesigned control panel includes touch screen. The large color screen allows you to create programs quickly and easily. Upgraded memory can now record up to eight different programs.

**Film Carriage Unit** Roll carriage has a direct braking transmission roller and is continuously adjustable. Simplifying roll loading and film insertion, the roll carriage is equipped with locking and quick release.

**Cutting and Clamping Unit** The automatic dual rod clamping and cutting system fully automates the Compacta SPG horizontal stretch wrapping process.
