Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Reliable Turntable Stretch Wrapper

The economical Robopac Ecoplat semi-auto turntable stretch wrapper wraps up to 25 pallets per hour.

Features

R-Connect R-Connect provides usage and performance data via the cloud. Meet Industry 4.0 demands with performance monitoring and optimization at your fingertips. R-Connect empowers you with actionable insight to promptly investigate alarms, adjust parameters, improve performance, reduce down time.

Record-a-Wrap Unique record-a-wrap feature to record wrap pattern. Start, stop, jog up, jog down are all recorded. Up to 20 movements.

Smooth Tension System Film tension braking system spreads force out evenly over a larger surface area resulting in a much smoother film delivery. No jerking movements that break the film.

FRD Control Panel The Ecoplat FRD control panel uses clear icons for simple programming.

FRD Carriage The FRD film carriage mechanical brake is manually adjusted with an indicator to show the tension setting. A tension on/off lever allows film to be released to attach it to the pallet without altering the tension. This system allows tension to be constant, not effected by the film roll size.

Film Delivery System

- Friction roller drive (FRD)
- Pre-stretch not available
- Core brake corner compensation
- Electrical force-to-load control
- 20" Standard film width (30" option)

Safety Features

- Roll carriage safety stop
- CE compliant
- Anti-fall device
- Lock-out / tag-out compliant
