Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Reliably Wrap up to 30 Pallet Loads per Hour

The Robopac Masterplat semi-automatic turntable stretch wrapper is designed for pallet wrapping operations that demand speed, durability, and ease-of-use. With the capacity to wrap up to 30 pallets per hour, this system is ideal for medium-volume packaging lines looking to improve consistency and reduce material costs.

The Masterplat stretch wrapper combines innovation and value in a rugged, semi-automatic stretch wrapper built to perform in demanding environments.

Features

R-Connect R-Connect provides usage and performance data via the cloud. Meet Industry 4.0 demands with performance monitoring and optimization at your fingertips. R-Connect empowers you with actionable insight to promptly investigate alarms, adjust parameters, improve performance, reduce down time.

Control Panel The control panel combines the Master Jog Dial graphic display. Intuitive icons simplify set up and selection of wrapping parameters for each load.

PGS Carriage The PGS film carriage utilizes a fixed gear for 250% power pre-stretch. Force-to-load tension is controlled by a strain gauge, adjusted on the control panel.

Low Profile Available Low-height base for simple pallet positioning with a hand truck.

Film Delivery System

- Containment force: Variable electronic
- Film carriage motor: ½ HP VAC
- Height sensing: Automatic via photocell
- Film threading: Patented S pattern
- Corner compensation: Load cell

Safety Features

- Anti-fall device on carriage
- Pressure activated safety stop on carriage
- CE Compliant, UL, CUL
