Wulftec Pallet Inverter

At a Glance

- Reliably and efficiently inverts pallet loads
- Turns a product 180 degrees to access bottom
- Transfer load to new pallet or slip sheet without unstacking product
- 4000 lb capacity

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Efficient Pallet Load Handling for Housekeeping, Sanitation, and Safety

The Wulftec Pallet Inverter is designed to provide reliable and efficient means of inverting loads for housekeeping, presentation, sanitation, or safety reasons.

Benefits of the Wulftec Pallet Inverter

Allows the transfer of product to pallet or slip sheet

Turns a product 180 degrees to access bottom

Switch incoming goods from wooden pallet to hygienic pallet

Remove damaged pallets and replace with new ones without unstacking the product

Features of the Wulftec Pallet Inverter

AC variable frequency drives as standard equipment on all machines

Lower maintenance and better reliability

Wulftec stretch wrappers will save time and money

NEMA 4/12 control panel dust tight and waterproof

Control panel is neatly organized eliminating time otherwise lost searching for wires

Control panel is UL508A approved

Superior Electrical/Electronic Design including Allen Bradley MicroLogix PLC and AC drives

All motors, proximity sensors, photoeyes and other sensors have quick disconnect cables that simplify installation and maintenance

Hydraulic actuated clamping

Pressure controlling device to adjust clamping force

Symmetrical clamping

Product height : minimum 40in / maximum 80in

4000lbs capacity

All Wulftec structures are made of heavy-duty steel for rugged performance, even in the harshest work environments

Wulftec machines are built to last forever

A 25" ring gear with pinion gear drive provides the strongest drive in the industry and is warrantied for 10 years

Rotation speed of 2 rev/min

Protection assured by an optical sensor to prevent clamps from moving if there is an object under them

Safety fence around the machine

Non-Proprietary parts accessible on a local base

Best Warranties in the Industry

1-year unlimited cycle warranty

10-year warranty on steel structure

Specifications

1/2" steel loading plate

Symmetrical clamping

For 40" x 48" pallets (other dimension available)

Separate control panel

Maximum load weight of 4000 lbs

Protection assured by an optical sensor, preventing clamps from moving if there is a object under

Safety fence around the machine

Heavy duty structural steel construction

Hydraulic actuated clamps

Compression controlled with pressure regulator on hydraulic units

Rotation speed of 2 RPM

25" Heavy duty Ring GEAR Bearing, driven by a 2HP motor

Can be loaded with hand pallet jack or forklift

Delivery: 8 to 10 weeks

Warranty: 1 year
